High School Totals	32.34%	36.84%	31.84%	35.56%
District Total	30.57%	33.38%	30.56%	32.31%

Mobility is defined as: The number of students transferring into and out of the building divided by the Fall BEDS Enrollment total for the building. The percentage reflects the proportion of total enrollment that is mobile. Understanding that one student who transfers out of the building in October and transfers back into the building in April counts as two events.

*2007-08 Mobility will not be considered a final calculation until the end of the school year.
